

Claim 57, line 10, after "wherein", delete "said extracellular domain and cytoplasmic domain are not naturally joined together, and"

line 14 , after "selected", insert --mammalian--,

line 16, after "cell", insert -when said extracellular domain binds to at least one ligand--.

C1

60. (Amended) A protein according to claim 57 wherein said extracellular binding domain is the heavy chain of an immunoglobulin, or truncated portions thereof containing ligand binding activity, wherein said heavy chain of immunoglobulin is by itself or in a protein complex with a light chain. [by itself or in conjunction with a light chain, or truncated portions thereof containing ligand binding activity.]

C2

Claim 61, line 3, after "thereof", insert --containing ligand binding activity--.

Claim 62, line 2, after "extracellular", insert --binding-- and after "is", insert --from--.

Claim 63, line 2, after "extracellular", insert --binding--, and after "is", insert --from--.

Claim 66, line 2, after "extracellular", insert --binding--, and after "define a", insert --second ligand--.

Claim 69, line 4, after "Claim II", delete "MHC" and insert --Major Histocompatibility Complex antigens--.
